

How To Make A Sock-Puppet

You will need:

- Socks (bigger than an ankle sock and preferably white or pale)
- Pens—to decorate and mark on measurements
- Scissors
- Glue
- Googly eyes
- Other decorative materials—pipe cleaners, wool, pom-poms, other fabrics, etc.

How to make it:

1. Get your sock and slip it over your hand, make a C-shape with your hand and place your fingers into the toes part and your thumb into the heel part.
2. Use a pen and make two dots above the seam where your toes would be in the sock to resemble eyes.
3. Take the sock off your arm and lay it flat on the table so you can see where you drew the two dots for the eyes.
4. Glue on googly eyes onto the dots.
5. Decorate your sock puppet in whatever way you want using whatever materials you may have at home.
